Corporate Background

July 2009

Global Leadership

Founded in 1947, Lake Region Medical has evolved from a manufacturer of pacing lead coils and precision machined products into a global leader in interventional and diagnostic medical devices. Lake Region Medical established its reputation for unsurpassed quality through the manufacture of over one quarter billion devices.

With a complete line of FDA-registered OEM guidewires and also manufacturing other class II and class III implantable and non-implantable devices, Lake Region Medical has competencies in design and regulatory submission, product validation, and DHF creation. Lake Region Medical is a privately-held organization with over 1,500 employees at its headquarter facilities in Chaska, Minnesota and manufacturing facilities in Chaska, Minnesota and New Ross and Galway, Ireland. Lake Region Medical currently markets to customers in more than 50 countries.

Quality Since 1947

Lake Region Medical has provided the highest quality products and services since 1947. Quality is inherent in every step of the process from early supply chain to final sterile products. This commitment to quality results in superior products, services and most important — patient safety.
